Promoted by:

2100 Projects Association – Scientific Association for Promotion of Technology and Management for Organizational and Social Transformative Change.

About the Conference:

The overall objectives of the conference are to advance the theory and practice of Business Sustainability, implementation and promotion of practices in companies towards sustainability across multiple dimensions on all organisational levels, from strategic management to operational levels, in every type of business and for every company's function. To bring people in the centre, as a critical success factor towards business sustainability.

To provide an innovative environment to Conference participants through a **new type of conference sessions** ([click here to see details on web page!](#)).

A shortlist of intended **topics** include: sustainability – economic, environmental and societal, business models, networked economy, knowledge economy, leadership and governance, learning organization, meta-organizations, production economics, research & development, employment, society, strategic management, integration, design, traditional and radical management, collaborativeness, organisational semiotics, chaos and complexity management, cloud organisations and business, and other emergent business sustainability issues in various application domains, such as manufacturing, services - commerce, education, transport, agriculture, healthcare, banking, government, and others, in the context of business sustainability, management, technology and learning for individuals, organisations and society in turbulent environment.

All accepted full papers will be published in the newly created Conf. Proceedings Journal, **Proceedings of 2100 Projects Association Joint Conferences**, ISSN: 2183-3060, published by 2100 Projects Association.
