Promoted by:

2100 Projects Association – Scientific Association for Promotion of Technology and Management for Organizational and Social Transformative Change.

About the Conference:

The overall objectives of the conference are to contribute to the development, implementation and promotion of advanced emergent IC technologies to be used in future Virtual and Networked Organizations, through the discussion and share of knowledge, experiences and scientific and technical results.

To provide an innovative environment to Conference participants through a **new type of conference sessions** ([click here to see details on web page!](#)).

A shortlist of intended **topics** include:

metaverse, virtual and augmented reality, ubiquitous computing and organizations, grid computing, cloud computing and architectures, human-computer interfaces, serious games, intelligence and soft computing, Big Data, data mining, data analytics, web services, cognitive systems, social networks and other emergent IT/IS approaches in various function domains, such as decision support systems, planning, design, control, negotiation, marketing, management, manufacturing, and many other, in the context of virtual and networked enterprises and organizations.

All accepted full papers will be published in the newly created Conf. Proceedings Journal, **Proceedings of 2100 Projects Association Joint Conferences**, ISSN: 2183-3060, published by 2100 Projects Association.
